**The Most Awarded  
Standing Desk. Ever.**

NextDesk Terra - (from left) Medium Bamboo with Brushed Aluminum Frame, Dark Bamboo with Matte Black Frame

## Designed to Inspire

It's not often that your office furniture inspires you to live a healthier, more active life. From desktop hybrids to fully adjustable conference desks, every NextDesk is designed to inspire and engineered to add movement to your life. With a wide variety of styles and ergonomic solutions, NextDesk will improve health and elevate productivity.

Sustainably-sourced materials like Bamboo, Rubberwood, and recycled Aluminum are manufactured to perfectly fit your style and space. microprocessor-controlled electric actuators and robust frame construction allow you to effortlessly add movement to your day while maximizing productivity. Explore the endless possibilities on 12 different models to build a NextDesk that beautifully complements your space.

## Redefining the Desk

NextDesk designers had one thing in mind: create an attractive, sleek, and modern power adjustable desk so anyone can add movement into their life. Every NextDesk is created with sustainable materials, state-of-the-art microprocessors, and science-backed ergonomics that express our passion for movement.

### Tradition of Innovation

Driven by an obsessive attention to detail, NextDesk sets the standard for adjustable height desks— genuine, sustainable, and sophisticated. The sleek design seamlessly conceals the state-of-the-art microprocessor controlled lifting system and advanced 18-volt DC motors. NextDesk has reinvented the desk as we know it and forever changed an industry that hasn't changed much in over a hundred years.

### Ergonomic Health

The human body is designed for movement, but in today's digital world, sitting consumes the majority of our day. Studies have shown that exercising isn't enough to offset the damage done by sitting for long hours. Introducing intervals of standing can improve energy, increase productivity, and combat a myriad of health issues. The life-enhancing movement that NextDesk provides has been associated with over a dozen health benefits supported by science.

### Sustainably Sourced

NextDesk materials are sourced for their sustainability, strength, and beauty. Sustainable desktop options like Bamboo or Rubberwood are inherently durable and exhibit a naturally warm aesthetic. Supporting this solid desktop is a sturdy frame of recycled aluminum, which requires less energy to make than other metals. NextDesk's beautiful design will impact you, but not the environment.

NextDesk Crossover - Medium Bamboo with Brushed Aluminum Frame

## The Beauty is in the Details

From the sophisticated style to the elegant movement to the way the buttons feel under your fingertips—the engineers have obsessed over every single detail.

## This is Vision in Sharp Focus

Delivering a high-performance desk requires finding harmony between power and elegance. With the touch of a button, watch your NextDesk glide smoothly and silently from sitting to standing in seconds. The soft-start and soft-stop technologies allow NextDesk to begin and end each transition without vibration or jarring movements. Its best-in-class lifting speed is made possible by dual 18-volt DC motors and an advanced microprocessor controller. These motors provide both strength and agility, allowing NextDesk to lift up to 630 pounds (Pro) at a rapid 1.7 inches per second.

A vertical tree trunk is the central focus, showing its natural texture and some white markings. A metal cup is suspended from the trunk by a wire. The background is a soft-focus forest scene with bamboo stalks on the left and green foliage on the right. The text is overlaid on the right side of the image.

## Easy on the Environment

The greatest environmental challenge facing the furniture industry today is the presence of formaldehyde. Most modern desks are made from pressed wood products, plastic laminate, veneer, or MDF. Going against the grain from the rest of our industry, we've completely eliminated these substances from all NextDesk products. We've also eliminated the use of solvent-based paints, putting NextDesk years ahead of our competitors. U.S.-based design and assembly allows for tight control and monitoring of construction, ensuring our products deliver the highest level of customer satisfaction.

# Our Family

Explore our rich variety of revolutionary standing desk designs to find the one that best suits your space and style. Whether you choose a standing desk hybrid like the Crossover or custom-sized adjustable height conference table, you'll receive the superior level of design, materials, and performance NextDesk is known for.

"The Terra is...a desk that you can proudly put in your den rather than hide away in a corner of your house."

Cult of Mac

NextDesk Terra - Dark Bamboo with Matte Black Frame

## nextdesk™ Terra

Featuring highly sustainable solid bamboo and rubberwood for elegant warmth and exceptional durability, the Terra radiates genuine, natural beauty. Choose from a variety of authentic wood and aluminum finishes to fit your style and space. An industry-leading power-adjustable lifting system elevates Terra to your optimal ergonomic height with a smooth, gliding motion. This balance of natural elegance and superior engineering set the stage for the Terra to become the most awarded standing desk, ever.

### Natural Materials. Natural Beauty.

Terra's beautiful natural wood desktops are designed to make an impact on you, but not the environment. Choose from genuine bamboo or rubberwood available in 6 solvent-free and UV-coated finishes to perfectly match your existing style.

### Best-in-Class Performance

Reach your ideal ergonomic height with the NextDesk microprocessor-controlled power lifting system. A best-in-class speed of 1.7 inches/second, programmable memory, unparalleled height range, and soft-start/soft-stop technology bring your desk to life with smooth, quiet transitions.

NextDesk Terra Pro - Light Bamboo with Brushed Aluminum

## nextdesk™ Terra Pro

Designed to raise the performance of Terra to a bold new level, the Terra Pro boasts unrivaled stability and a 630lbs lifting capacity. Four powerful lifting columns and an extra-wide footprint allow the Pro to effortlessly lift complex workspace set ups in a smooth, gentle gliding motion without jarring starts or stops. The Pro elevates the potential of Terra with an unprecedented level of power and capacity.

### The Power of Four

The power of the Terra Pro is all in the revolutionary frame design. Four powerful columns house 18-volt DC motors that effortlessly lift up to 630lbs.

### Unmatched Stability

The unique 45-degree angled columns provide superior weight displacement distribution for unbeatable stability

“The Encore is beautiful. Everyone who has come into my house over the past month has stopped to comment on the desk”

NextDesk Encore - (from left) Medium Rubberwood with Silver Frame, Dark Rubberwood with white frame

## nextdesk™ Encore

NextDesk Encore is the world’s first standing desk to feature genuine Rubberwood desktops. NextDesk went back to the source for this stunningly original desktop that looks and feels much like Oak. Mother Nature is the master of design and Rubberwood brings a warm, natural style to any office. The solid wood desktop is protected by the latest in UV-cured coating technology that allows the natural life of the wood to shine through. This solvent-free finish is hard, durable, and odor-free, making it the perfect choice for an Encore Rubberwood desktop.

### Remarkably Repurposed

Rubberwood is sourced from rubber trees that are otherwise burned when latex production stops. Rather than waste this beautiful resource, NextDesk uses the harvested material to produce a desktop that is superior to other hardwoods.

### Elegant Strength

A feature unique to the Encore is its solid steel support frame. Steel requires fewer materials in construction when compared to similar metals, while maintaining a strong, durable footing.

“You place it on a tabletop of your choice—your existing desk, kitchen counter, living room table, whatever—and at the press of a button, the hybrid workstation lifts and lowers.”

## nextdesk™ Crossover

The NextDesk Crossover is a true hybrid, combining the genes of a modern power-adjustable standing desk with the space of your existing desk. Add up to 21 inches of vertical height over your existing desk without relying on clunky scissor lifts, hand cranks, or mounts. Simply press a button to transform your desk into a workspace that supports movement, enhances productivity, and increases energy levels.

### Your Desk, Transformed

Sized to fit virtually any desk, just place the Crossover on your existing desktop and enjoy all the benefits of a full-size standing desk.

### Automatic, No Cranks or Mounts

Adding movement to your life is truly effortless with the Crossover. Simply press the soft touch buttons and the internal microprocessor precisely controls every movement and your desk gently glides to your preferred height.

"...there's no other sit/stand desk we've ever used that was this well made. You can have a great standing desk, or a great sitting desk, or a beautiful desk, but if you want all of those in one desk, the Air from NextDesk would be our pick."

Score of 100 / 100 "Kick Ass!"

NextDesk Air - Brushed Aluminum

## nextdesk™ Air

More a work of art than simply a desk, the NextDesk Air top surface is so amazingly thin that it appears to float on air. The world's thinnest desk surface measures a remarkable 0.25 inch. To maximize strength, the Air top surface is laser cut from a solid piece of recycled aluminum. A thin top layer of tempered glass provides stunning visual depth and light refraction.

### Sleek. Solid. Stunning.

A thin top layer of tempered glass is backed by a solid piece of recycled aluminum for visual depth and beautiful light refraction. Measuring at only 0.25 inch thick, the Air features the world's thinnest desk surface that just so happens to be the most visually stunning as well

### Recycled Aluminum Beauty

Enhancing and supporting the sleek design of the Air is a solid, recycled aluminum frame available in five different finishes.

NextDesk Air - Gloss Black

## nextdesk™ Air Pro

The Air Pro elevates the elegance of the NextDesk Air with the strength and power of four powerful columns. With a bold, expressive design, the Pro delivers more power, more stability, and an increased weight capacity. Its design is bold yet refined, boasting an undeniable sense of potential and strength. An impressive balance of strength and refined beauty, the Pro will transform your workspace into a work of art.

### Bold, Expressive Design

For optimal stability that delivers a stunning visual presence, the Air Pro features four power lifting columns for maximum stability. With a low-profile crossbar crafted from solid half-inch recycled aluminum, this artfully designed support adds an additional level of stability.

### The Power of Four

The power of the Air Pro comes from the revolutionary quad column frame design. Four powerful columns house 18-volt DC motors to effortlessly lift up to 630lbs, seemingly on air.

“...both ergonomically great and perfect for all-purposes work spaces.”

NextDesk L-Series - Medium Bamboo, Gloss Black Frame

## nextdesk™ L-Series

NextDesk Custom L Series is available with up to 250% more desk surface area than standard desktops. Available in sleek aluminum or 6 different finishes of bamboo, the NextDesk Custom L Series creates a spacious environment around you. Built to virtually any size, the L-Series delivers the highest level of customization available.

### Built For You

Designed according to your specifications, the L-Series offers precise customization of materials and style. Choose your size, shape, material, and color and NextDesk will build a desk that fits you perfectly.

### Best-in-class NextDesk Features

Maximize workspace and increase productivity with a hand-crafted custom power-adjustable L desk. Customize your ideal ergonomic workstation and enjoy over 267 positions with the push of a button.

“NextDesk is the Mercedes-Benz of standing desks...the Solo Plus is the greatest thing to ever happen to Metro.”

PATENT

NextDesk Solo Plus  
Dark Bamboo Silver Frame

## nextdesk™ Solo Plus

The Solo Plus features a unique single-column design that makes it the perfect addition for your space-challenged room or office. Sturdy and height-adjustable, the Solo Plus provides a generous workspace with a small footprint. Designed to maximize usable working space while occupying less floor space, you can now enjoy the freedom of an adjustable height desk in any sized room or office.

### Elegantly Hidden Inside

Inside the powerful, yet minimalist single-column support base is an advanced system of smooth, quiet motors. A state-of-the-art microprocessor-controlled lift system quietly moves the desktop at a quick 1.7 inches per second.

### Space-Saving Footprint

The Solo Plus offers maximum stability with minimalist presence. Its large desktop provides ample working space without overtaking the floor space of smaller rooms.

“NextDesk produces some of the most beautiful standing desks around, and... there’s also an eco-friendly vibe.”

**OH GIZMO!**

NextDesk Up (from left) Medium Bamboo with Brushed Aluminum Frame, Light Bamboo with Gloss White Frame

## nextdesk™ Up

NextDesk Up is a fixed-height standing desk designed and engineered from the same quality materials of power-adjustable height NextDesks. Choose from 5 standard height options, or define your own custom height. Available in the warm bamboo and sustainable rubberwood desktops. The NextDesk Up is the perfect way to commit to a healthier, standing work lifestyle.

### Nature, Elevated

Customize the Up to match your existing space and style with stunning sustainable materials. Each desktop is finished with a 100% solid ultraviolet cure that will protect your investment for years to come.

### The Strength to Stand

The NextDesk Up frame is designed to be the most stable standing desk surface available while maintaining a sleek minimalist design.

NextDesk Custom Air - U-Shaped, Brushed Aluminum Finish

## nextdesk™ Custom

NextDesk makes hand-crafted custom power-adjustable desks in an unlimited number of shapes, sizes, styles, colors and stains, only limited by your imagination. Looking for a NextDesk shaped like a guitar? No problem. Looking for a custom bamboo stain to match existing furniture? Done. Your hand-crafted, power-adjustable desk can be built in virtually any shape, size, color and material you can imagine.

### Limited Only By Your Imagination

Always wanted a guitar-shaped desk? No problem. NextDesks can be constructed in virtually any number of shapes, sizes, styles, colors, and finishes.

### Uniquely Yours

From a cockpit-shaped U-desk to 15 foot long group workstation with eight power-lifting columns—the custom possibilities are truly endless.

NextDesk Conference - Light Bamboo with Silver Frame

## nextdesk™ Conference

We all know the health benefits that a standing lifestyle can provide an individual, and now your entire office can experience those benefits as well. Studies have shown that standing meetings are shorter and more productive, with improved alertness and focus. The NextDesk Adjustable Conference Desk lets you and your coworkers collaborate as you stand and stay mobile together. Let us help you design the perfect standing conference desk for your group meetings.

### Increased Productivity

Studies have shown that by adding adjustable height desks into the workspace, productivity increased by 25%. Additionally, groups that held meetings around a standing conference table reported a reduction of meeting times by over 40%.

### Your Space, Your Style

A NextDesk conference table offers the same high-quality materials in custom stains and styles. Just contact us to have a unique desk designed specifically for your space and style.

## Your Favorite Options

One of the newest options is the NextSpace 6-way keyboard platform. Based on years of ergonomic research, NextSpace maximizes desk space while helping you achieve the perfect keyboard placement at any position. Protect all of your important electronic equipment and connected devices with NextDesk's optional Integrated Power Management System.

Maintain the integrity of your desk's sleek design with the optional Vanity Cover and Integrated Cable Management Raceway and make cable clutter a thing of the past. To protect the natural beauty of your desktop, you might consider a TopShield to protect your desktop surface against wear and tear.

With NextDesk accessories and options, there are endless possibilities to customize your desk for enhanced beauty and ergonomics.

A wooden desk with a keyboard and mouse, a monitor, and a notebook, set against a brick wall background. The desk is made of light-colored wood and has a black keyboard and mouse on it. A monitor is mounted on the desk, and a notebook with a pen is on the left side. The background is a red brick wall with a window on the left and a plant on the right.

# Best-in-class Warranty

Backed by a best-in-class 5-year warranty, NextDesk is guaranteed to deliver the highest level of satisfaction for years to come. In addition to offering the most robust warranty in the industry, we also offer a 30-Day Satisfaction Guarantee to ensure that you are 100% happy with your new NextDesk.

# Made to Order in the USA.

From start to finish, NextDesks are designed, developed, and built in the USA. Based in Austin, Texas, NextDesk delivers state-of-the-art power-adjustable technology straight from the heart of Texas to locations all over the world.

## Customized For You

The NextDesk Configurator allows you to make your NextDesk uniquely yours. The exact aesthetic and design of your NextDesk is completely up to you.
